

About Ventuz Technology AG

Ventuz Technology AG is one of the leading providers for the media, entertainment and technology industry empowering brands to interactively communicate with their audiences using high quality visual effects in broadcasting, virtual and augmented realities as well as live events. By providing innovative, data-driven software solutions for 3D real-time graphics content creation, authoring and playout control Ventuz supports creative high-end designs in any area of audiovisual content production.

The software suite of Ventuz can be used for professional presentations, video wall setups, multitouch applications or on-air and in-studio broadcast graphics.

Ventuz Technology was founded 2004 by experts from the broadcast graphics and event industries and is headquartered in Hamburg/Germany with subsidiaries in Europe, the USA and Asia-Pacific.

The Ventuz Software suite is used by the world's leading broadcasters, interactive design agencies and corporate creative departments including Adidas, Ernst & Young, Lufthansa, Microsoft, Renault, BBC, Fox News, Porsche, Audi, Toyota, Marriott Hotels, Sony, Deutsche Telekom and many more.
